

Bank of India Cyber Security and Resilience Architecture

Bank of India Master Policy | Domain: Cyber Security

1. Governance and Infrastructure Security

Bank of India maintains a 24x7 Security Operations Centre (SOC) monitoring network traffic and access logs.

All remote management interfaces must enforce Multi-Factor Authentication (MFA) and Zero Trust Access control.

Vulnerability Assessment and Penetration Testing (VAPT) must be executed quarterly by CERT-In empaneled vendors.

2. Incident Management & Data Backups

Cyber incidents must be escalated to the CISO immediately and reported to CERT-In / CSIRT-Fin within 6 hours.

Offline immutable backups of critical core banking and database snapshots must be tested every month.
